## MERRY-GO-ROUND

The new, big, Merry-Go-Round makes a striking item with plenty of flashing, sales-appearance. Operates without winding. Only one pressure of the lever in base is required to operate it. It revolves at a steady pace, while the musical unit plays a merry tune. The arrow on the base provides an attractive game idea; the horse that stops at the arrow is the winner. Sparkling colors. Substantially constructed of metal.

Overall Height 14 1/4"  
Diameter of Base 11".

No. 31. Price.....\$2.50

## TWIN SPIN

Here is an unusual marble game presenting a "new twist" in action that sets it apart from all others. In "Twin Spin" the marble is snapped from the spring trigger around the double loops. It has two different chances to score. First, it may fall into one of the scoring holes in the cross-chute. Or it may spin around the second loop to drop through a release onto the bottom. There one of the channels will carry it to a lower scoring hole in the base. The game comes all set up ready for play. Four marbles are included.

## MERRY-GO-ROUND

This new Merry-Go-Round operates without winding. One pressure and base sends it whirling steadily around while the music tinkles merrily.

The brass ring offers an interesting game feature. The horse whose body is over the brass ring when it stops, is the winner. Overall height 12 1/2". Diameter of base, 9 3/4".

No. 30. Price.....\$1.00

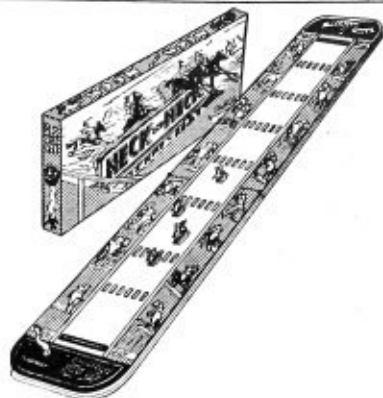

## SHOOTING GALLERY

The six steel balls included are loaded into the gun, which feeds one shot at a time. The targets are numbered, showing the amount of the score. When a direct hit is made the ball rolls down into the corresponding channel which also shows amount of the score. "No Hits" are indicated by the channel marked "O". A shot through the "500" target rings a bell. There are three hinged targets, which, when hit, fall down, and add to the other scores. The balls cannot roll off the game or table. The gun is adjusted so that the user cannot shoot above the targets. It can be swiveled in any right or left motion. Base 18 1/4" x 11 1/2". Overall height 7 1/2".

### UTILITY BAG

Durable bag of attractive design, made of the same heavy elk leather as the all leather golf bags. Not a light weight leather reinforced with cardboard. Made with soft form fitting handles and welted seams all double stitched. Lined with waterproof tweed cloth with an inside pocket and glove fastener extending the length of the bag, suitable for soiled clothing. Has hookless slide fastener with facilities for locking. The same care is used in producing this bag as in our golf bags, so it will give extremely long service. Made in two sizes in either brown or black.

### No. 33

Heavy galvanized blades.

The blade is corrugated and is further stiffened by Angle Steel Ribs or Braces, which are riveted to the handle and blade, and support the blade practically to the edges of the shovel. It is apparent that these steel ribs are very stiff and cannot straighten out in damp weather, nor split and sliver up.

The handle is of hardwood, varnished, and is square, with rounded corners. It is riveted to the blade and to the angle steel brace, being enclosed by galvanized steel clasps.

The "D" top is of black iron, riveted to the handle.

The blade is reinforced by a rod enclosed in the edges.

Extra heavy ribbed steel shoe.

Price ..... **\$16.00**

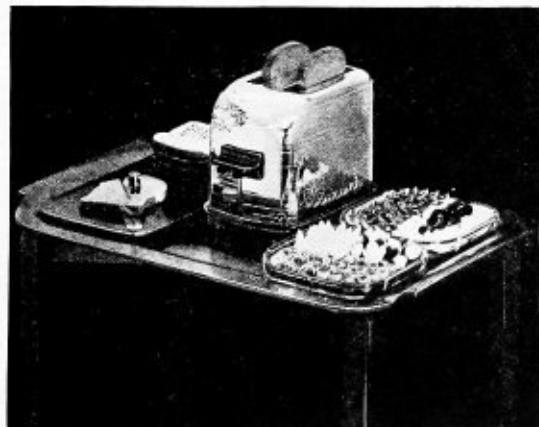

### TOASTMASTER "Junior" TOASTER

WITH FINGER-TIP CONTROL

Makes perfect Toastmaster toast, but unlike the fully automatic Toastmaster toaster, it requires watching. Just drop in the bread, press down the lever, and the current comes on automatically. When the toast is done about as you like it, both sides browned at once, a finger-tip touch of the lever will pop it up for inspection or use, and the current is shut off automatically. If the toast is not exactly the shade of brown you like, lower it again for a few seconds. Toastmaster quality throughout.

Price ..... **\$7.50**

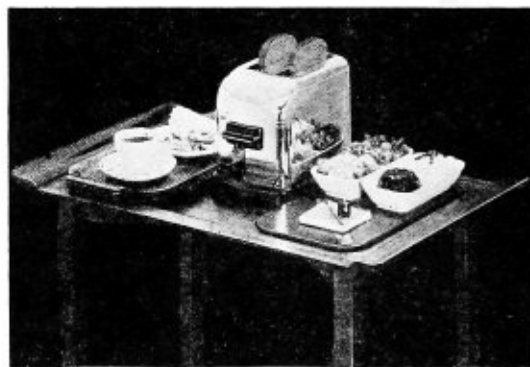

### HOSPITALITY TRAY SET

### DURO — PRODUCTION 24-Inch SCROLL SAW

The many improvements and refinements added to the Duro Production Scroll Saw make it the greatest machine ever built. The absolute lack of vibration in the Duro Scroll Saw will prove a distinct revelation. The blades used are usually very small. While strong, they still are unable to withstand much vibration. By the design and construction of an extra-ordinarily substantial frame—by the use of a carefully balanced operating mechanism—and by an entirely new application of an adjustable spring tension housed in the upper arm, the Duro engineers have accomplished a smooth, vibration-free action that is outstanding.

The most modern and practical Polishing Head developed in years. The base acts as a belt guard, an added safety feature. May be driven from below or behind. Fitted with 2 1/4 inch V-Pulley for 1/2 inch V-Belt and runs on 1/2-inch steel shaft mounted on two self-lubricating bearings. For best results, use 3-inch Pulley on motor or line shaft running at 1750 R.P.M. Baked gray enamel finish. Complete with tool rest; guard; 1/2 x 4 inch grinding wheel; 4 inch buffing wheel and cake of polishing compound.

3045A—Complete as illustrated.....\$3.35

3045B—Polishing Head, less grinding wheel,  
buging cloth and compound.....\$2.90

**DURO BENCH GRINDER**

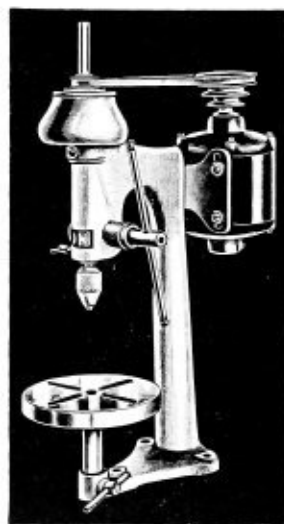

An ideal bench grinder for woodworking shop or garage. Extra heavy, 6 by 5 in. gray iron base designed so that belt can be driven from top, back or below bench. Plenty of weight and large enough base to give smooth grinding free from vibration. Handy adjustable tool rests and heavy gray iron guards. Ground, 8 by 5/8-in. steel shaft fitted with oversize bronze bearings. 1 3/4 in. pulley with 1 3/4 in. face, grooved for V, round or flat belt. Two 1/2 by 6 in. carborundum wheels, 1 fine, 1 coarse grain. Can also use wire scratch wheels and buffing cloths listed on page 26. Durable baked gray enamel finish.

No. 3041. Price.....\$7.45

**DURO****7-Inch TABLE SAW**

Most outstanding are the devices which elevate and tilt the table. The table—not the saw blade—raises and lowers by the simple turning of the large star hand wheel. Table tilts smoothly and accurately on wide trunnions at front and rear which travel in saddles that are part of the table bracket. The large, heavy 10 by 14 inch table is of high quality gray iron, machine ground with the same care as all other Duro-built tables. Only a very narrow slot is required for the saw blade as the table tilts on its own axis. A removable throat is provided for dado head or sanding disc.

No. 3082

**COMPLETE WITH 4-STEP PULLEY AND  
BELT—LESS MOTOR**

An excellent quality 3-jaw chuck is furnished. It has a capacity of 0 to 1/2 inch in metal. The table is heavy cast iron machine ground and slotted and full 8 inches in diameter. Maximum distance from chuck to table is 7 3/4 inches. Maximum distance from center of drill to column is 6 inches. Height overall 28 inches. Use 1/4 or 1/2 H.P. motor. Finished in gray enamel baked on.

## DURO PRODUCTION LATHE

### Swings 13-Inch Stock Over Bed

No. 3056

36-Inch Capacity Between Centers

A Production machine of outstanding quality and design. Made of the very finest materials and incorporating many features and improvements, a tool meeting all the requirements of the Master Craftsman or the Production Shop. It has strength, rigidity and absolute lack of vibration under the most severe conditions. Carefully designed and machined to close limits; only the highest grade materials are used to provide a Lathe that will handle the finest work with precision. A machine that sets a new standard in efficiency and economy of operation, and materially widens the range of work that can be done on wood-working lathes.

## DURO HEAVY DUTY LATHE

No. 3053

10-Inch Swing  
31 Inches Between Centers

Here is a tool built to the same exacting standards as our Production Lathe selling at a price very much below what such high class lathes always have cost. Workmanship, that never has been attempted before in moderate price lathes, is incorporated. The design of bed, head and tailstock results in affording the most strength and value per pound ever achieved in a wood-working tool. And further, the precise and perfect alignment of head and tailstock, the proper suspension of the pulley and the accurately milled ways all combine to permit work of every character, from the very finest to the heaviest.
